

Engineering

The Southwest Prairie Technical Service Area is an entity created by the 11 SWCD's located in SW MN. Its purpose is to provide increased technical capacity to its SWCD members. It currently employs 2 staff (a Professional Engineer, and a Technician) who's workload is prioritized by the SWCD members.

Southwest Prairie Technical Service Area V

Southwest Prairie Technical Service Area V is a joint powers organization and provides engineering services to: Cottonwood, Jackson, Lac qui Parle, Lincoln, Lyon, Nobles, Murray, Pipestone, Redwood, Rock and Yellow Medicine Soil and Water Conservation Districts.

Soil and Water Conservation Districts tasked with providing conservation engineering assistance to member SWCDs and Southwest Minnesota land users. The Murray SWCD serves as the Host District for this program. Funds to support this program come from the Minnesota Board of Water and Soil Resources Nonpoint Engineering Assistance Program. Project assistance is requested through the local SWCD.

TSA Staff

Russell Hoogendoorn

Engineer – Rock SWCD

Mike Skoglund

Technician – Murray SWCD
